English	Fluent

Summary // 7+ years

QA Engineer with 7+ years of experience across manual and automation testing. Over the last two years, specialized in Playwright — building automation frameworks in JavaScript and TypeScript and wiring them into CircleCI, alongside API testing with Postman on GCP infrastructure. Works in close step with engineering, occasionally taking on development tasks when a sprint calls for it, bringing an analytical, test-first mindset from the first planning conversation through to automated coverage running in CI. Also leads and trains a QA team, growing testers from manual work into automation.

How I Work // pipeline

Experience // log --oneline

Senior QA & Automation

Jul 2022 - Present

accessiBe

- › Own automation strategy end-to-end with Playwright, TypeScript & JavaScript, running in CircleCI.
- › Lead and train a QA team based in India, growing them from manual testing into automation.
- › Work in close step with developers, occasionally taking on development tasks during high-load sprints.
- › Cover API testing (Postman), performance testing, and UI & accessibility compliance.

Software QA Engineer

May 2020 - Jul 2022

Migdal Insurance, Tel Aviv

- › Manual and regression testing across core insurance platforms.
- › Bug tracking and Agile ceremonies; laid the groundwork for the automation move that followed.

Software QA Engineer

Jul 2018 - Apr 2020

Leumi Bank, Tel Aviv

- › Manual QA across core banking systems, with JIRA-based bug tracking.
- › Built strong testing fundamentals, later formalized with an ISTQB certification.

Adi Zimhi - QA Automation Engineer - built line by line, tested end to end.
